Ventura Systems Tools

Tool: Ventura Diagnostic Kit (V-Diag Kit) for end users
Part number: VB2110
Application: All door systems with Ventura DCU

Description

This V-Diag Kit can be used to perform diagnostic analyses on the Door Control Unit (DCU).
This version is specifically for end users and has the following capabilities:

- Read live status from DCU
- Read I/O and status from DCU
- Read DTC's from the DCU
- Update the software of the DCU
- Load prepared parameter files into the DCU

For the correct use of the V-Diag Kit consult the DCU system manual.

Disclaimer: maintenance, calibration and proper use of tooling is the responsibility of the customer.
